INDEVA Group Policy Environment and Energy

INDEVA Group believes in sustainable development and is committed to minimizing the expenditure of non-renewable resources, to keep the consumption of renewable energy within the limits of sustainability and to constantly improve its environmental impact through consumption control actions and the continuous improvement of production processes and product quality.

INDEVA Group is committed to responsible management and complies with all laws, regulations and regulations concerning water management.

INDEVA GROUP pays particular attention to the selection of the chemical substances used, favoring those with a lower environmental impact and managing processing residues according to current regulations.

INDEVA Group is strongly rooted in the territory that is committed to preserving and developing in a responsible and sustainable way for future generations.

INDEVA Group is committed to minimizing its impact on the environment also by improving air quality through careful control of the air filters of its machinery in compliance with applicable laws and through a control of CO2 emissions.

INDEVA Group also adopts an accurate management system of natural resources and is committed to rationalize the use of natural resources and reduce waste production

INDEVA Group in compliance with all voluntary and legal requirements is constantly committed to the development of its business activities in balance between the achievement of economic financial results and the logic of social and environmental responsibility.

In order to maintain this balance, INDEVA Group implements an action plan that involves people, the process, the product and the supply chain.

INDEVA Group shares with employees:

- the principles, objectives and instruments defined by the management system.
- promotes awareness of sustainability issues through training events, adherence to programs for the protection of workers' health
- guarantees all stakeholders transparency on issues of accountability and transparency on environmental issues

In its processes , INDEVA Group is committed as far as technically possible to adopting production techniques that are as environmentally sustainable as possible.

In its products, INDEVA Group is committed to innovate its products in order to provide its customers with a product that is increasingly efficient, in terms of ergonomics and safeguarding the health and well-being of the final operator, and environmentally friendly.

With its suppliers INDEVA Group is committed to considering its supply chain as a link in a single chain in which the improvement of each in terms of sustainability contributes to the achievement of the Sustainable Development Goals (SDGs) of the 2030 Agenda of the United Nations.
